

Depth-Anything V3 Validation Report (Enhanced)

Key Findings:

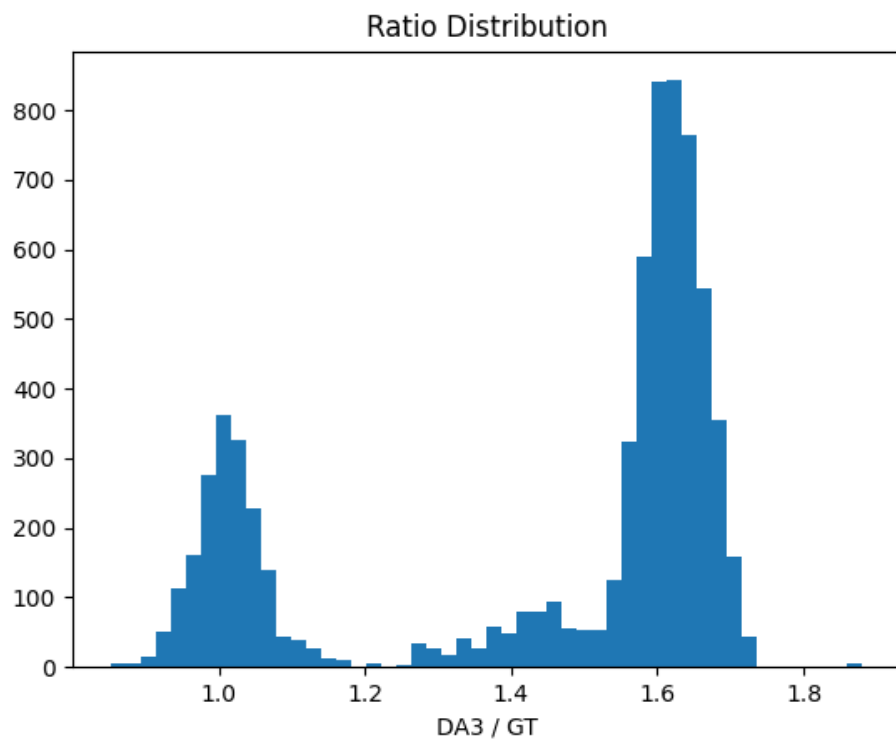

- Mean ratio (DA3/GT): 1.45
- Linear fit: $GT \approx 0.501 * DA3 + 0.611$
- Behavior: Nonlinear, distance-dependent distortion
- Stability: High (low noise, consistent across markers)

Ratio vs GT depth (shows nonlinear scaling)

DA3 vs GT (ideal would be $y=x$)

Distribution of scale ratio
